SUMMARY

Aspiring **AI/ML Engineer with Data Analytics expertise**, experienced in building machine learning models, real-time AI systems, and data-driven applications. Skilled in Python, Java, and end-to-end ML pipelines with a strong problem-solving mindset.

EDUCATION

B.Tech, Computer Science & Engineering
VIT Bhopal University

2022–2026
CPI: 8.13

Class XII
Boys High School, Prayagraj

2021
91.2%

Class X
Boys High School, Prayagraj

2019
89%

TECHNICAL SKILLS

Languages: Java, Python, SQL

ML & Data: scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Gen AI, LangChain

Data Analytics & BI: Power BI, DAX, Power Query Editor, Excel

Web & Tools: Streamlit, REST APIs, HTML/CSS, JavaScript

DevOps & Version Control: Git, GitHub

PROJECTS

Pitch Vision — YOLOv8 — Mistral-7B (LoRA)

GitHub

- Developed a real-time football analytics pipeline for player and ball detection, tracking, speed estimation, and team network analysis.
- Fine-tuned Mistral-7B using LoRA to generate coach-style tactical explanations from structured match data.
- Built an explainable vision-to-language system converting low-level visual features into high-level tactical insights.

Customer Churn Prediction — Machine Learning — Python

GitHub

- Built and evaluated classification models using Logistic Regression and Random Forest to predict customer churn.
- Performed preprocessing, feature engineering, cross-validation, and metric-based evaluation (precision, recall, F1-score).
- Analyzed churn drivers to generate actionable insights for retention strategies.

Career Navigator — ML — Streamlit

GitHub

- Designed an end-to-end ML pipeline to predict placement packages using academic and skill-based features.
- Created a synthetic dataset and applied feature engineering with Random Forest regression.
- Deployed the model as an interactive Streamlit web application.

Sales & Business Insights Dashboard — Power BI — DAX

GitHub

- Built an interactive dashboard to analyze sales performance, revenue trends, and customer segmentation.
 - Used Power Query for data transformation and DAX for KPI calculations.
 - Designed reports with filters and slicers to support data-driven decision making.
-

ACHIEVEMENTS

- Selected for Immersion special placement training program.
- Captain, college football team — led team to 4 tournament wins.
- Volunteered at TCS campus placement drive.
