## Education

|                                            |                  |
|--------------------------------------------|------------------|
| <b>VIT Bhopal University</b>               | <b>2022–2026</b> |
| B.Tech in Computer Science and Engineering | CGPA: 8.13       |
| <b>Boys High School, Prayagraj</b>         | <b>2021</b>      |
| Class XII                                  | 91.2%            |
| <b>Boys High School, Prayagraj</b>         | <b>2019</b>      |
| Class X                                    | 89%              |

## Technical Skills

**Languages:** Java, Python, SQL

**AI/ML:** scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, LangChain, Generative AI, RAG, Vector Databases

**Data Analytics & BI:** Power BI, DAX, Power Query, Excel, Snowflake

**Web & Tools:** Streamlit, REST APIs, HTML/CSS, JavaScript

**Version Control:** Git, GitHub

## Projects

### Pitch Vision — YOLOv8, Mistral-7B (LoRA), Python

- Built a real-time football analytics system for player and ball tracking, speed estimation, and tactical analysis.
- Developed a vision-to-language pipeline that generated coach-style tactical insights from structured match data.
- Implemented the solution using YOLOv8, Mistral-7B, LoRA, Python, and computer vision techniques.

### Sales & Business Insights Dashboard — Power BI, DAX

- Developed an interactive dashboard to analyze sales performance, revenue trends, and customer segmentation.
- Enabled KPI tracking and data-driven decision making through dynamic reports and visualizations.
- Used Power BI, DAX, Power Query, and Excel for data transformation and dashboard development.

### Career Navigator — Streamlit, Machine Learning

- Designed an end-to-end machine learning application to predict placement packages using academic and skill-based features.
- Deployed an interactive prediction tool for career insights and placement estimation.
- Built the application using Python, Streamlit, Random Forest, and Pandas.

## Work Experience

### Machine Learning Intern — CodSoft Aug 2024 – Sep 2024

- Built machine learning models and completed projects involving data preprocessing and predictive modeling.
- Strengthened practical understanding of end-to-end ML workflows, model evaluation, and deployment concepts.
- Worked with Python, scikit-learn, Pandas, and NumPy.

## Certifications

- IBM Machine Learning with Python
- IBM GEN AI Using IBM Watsonx
- NPTEL Marketing Analytics

## Achievements

- Solved **300+** coding problems across LeetCode and other competitive programming platforms.
- Achieved a **LeetCode** rating of **1464** and a **Codeforces** rating of **1077**.
